Combined (NDVI+NDWI): Cluster Map + Real−World Validation Summary

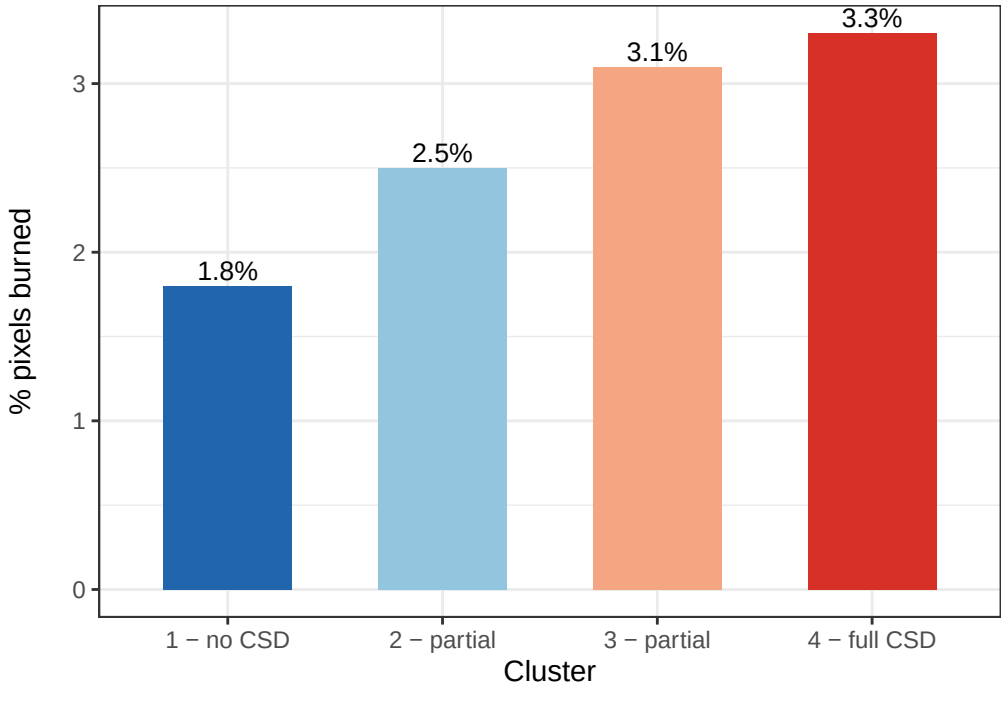

Cluster Map

White gaps: pixels burned (MTBS moderate+ severity) at any point 2000−2014, excluded before clustering

Fire (MTBS)

% of pixels burned (severity >= moderate) − ground−truth validation, after cluster assignment

Beetle (USFS ADS)

% of pixels with bark beetle mortality (mean TPA shown for reference) − ground−truth validation, after cluster assignment
